Introduction

Welcome to The Big Bang Fair Visiting Schools' Risk Assessment. As you will know, you have obligations when planning any school activity to ensure the Health and Safety and well-being of your pupils and likewise, the school has an obligation to make sure that any activity you undertake as their employee is also safe for you.

The following document is to assist you in your obligations on this front.

There is a myriad of rules and regulations in relation the Management of Health and Safety (Workplace) Regulations 1999, which is surrounded by many codes of practices. With our experts, we have taken note of all of these rules and identified the risks and hazards that might be present at The Big Bang Fair and we have put in place rigorous controls and operational plans to reduce all of these to create a safe, exciting and informed educational experience for all attending the event.

The Event Organisers have undertaken this risk assessment and carried out the following:

- **GATHER INFORMATION/IDENTIFY RISKS**
- **IMPLEMENT CONTROL MEASURES APPROPRIATE TO THE IDENTIFIED RISKS**
- **EVALUATE RESIDUAL RISK ONCE ALL RISK MANAGEMENT IS IN PLACE**

To quantify the level of risk we have used a matrix to score the level of the risk, its severity and the likelihood and consequences. Once the risk management has been put in place we revisited the matrix and re-scored the hazards and the final score identifies the final assessed severity, likelihood and consequences.

We would ask you to convey all of this information to other supervising adults whom will be traveling with you to The Big Bang Fair.

The NEC is a large exhibition complex and can be very daunting at the best of time. Please be aware we are not the sole users of the venue and there will be other exhibitions and activities taking place at the time of the Big Bang Fair, with additional attractions such as shops, food outlets and coffee shops on the Concourses that are open and might attract the attention of the young adults in your care. The same facilities are available within the exhibition so there should be no need for people to leave the halls. The whole of the NEC complex is secured and covered by CCTV and we will have specific security and event staff within Halls 17-20 to ensure the safety of all visitors to the exhibition. However, The Big Bang Education CIC will not prevent visitors from leaving the Halls should they wish to and we do not have responsibility to manage the security outside of Halls 17-20. There are other exhibitions and activities taking place in at the NEC at the same time as the Big Bang.

The event has taken note of its duty of care to all involved in the event and those attending and we have used all reasonable and practical measures to control the identified risks.

During the event period, there is a process of continuous assessment and reassessment that will be undertaken by the Event Safety Advisors, to ensure appropriate risk controls are put in place should situations develop, which are not covered by this assessment. As it is a dynamic situation, the Event Safety Advisors will respond accordingly.

The Event Safety Advisors are independent to the event and provide operational support, guidance, assistance and advice on all aspects of Health and Safety. They check all aspects of the risks and Health and Safety of all contractors and subcontractors and the safety of all staff and the public in attendance at the event, whilst working closely with the NEC teams. They are present on site during the build and break down of the event and on site the whole time the public are in attendance and operational at all times to ensure compliance at all times and a safe delivery of the event.

This document relies on the support of the Event Team, contractors, subcontractors, exhibitors, event staff including The Big Bang Education CIC team, volunteers and any other contributors to the event.

The Event Team includes the fresh Group, their contractors and sub-contractors who co-ordinate all aspects of the event from pre-planning to the delivery of the event, working closely with the Big Bang Education CIC.

Alongside this Risk Assessment, there is a full event safety file holding all the risk data from exhibitors and sub-contractors.

With the current threat to safety in the UK and higher state of alert we are currently at we ask you to take a look at the following links.

<http://www.npcc.police.uk/NPCCBusinessAreas/WeaponAttacksStaySafe.aspx>

<https://www.pshe-association.org.uk/news/guidance-discussing-terrorist-attacks-your-pupils>

Lost persons

Both the event and the venue have a robust lost persons policy and a committed and competent team to manage all aspects of this. With an event of this nature, we do get missing persons. Please could we ask that you inform all the people in your care that should they become separated from your party, to make themselves known to a member of the venue security team or the Information Desks.

Staff taking care of visiting groups should ensure that their mobile phones are fully charged and on; just in case we need to contact them.

Please also ensure that the registration system has the correct contact information for your group.

LIKELIHOOD (L)	RISK RANKING MATRIX				
HIGH 5	5	10	15	20	25
SIGNIFICANT 4	4	8	12	16	20
MODERATE 3	3	6	9	12	15
LOW 2	2	4	6	8	10
NEGLIGIBLE 1	1	2	3	4	5
CONSEQUENCE (C)	NEGLIGIBLE 1	LOW 2	MODERATE 3	MAJOR 4	CATASTROPHIC 5

LIKELIHOOD DEFINITIONS	
A high likelihood	<ul style="list-style-type: none"> It is expected to occur in most circumstances There is a strong likelihood of the hazards reoccurring The incident has happened repeatedly before and is expected again
A significant likelihood	<ul style="list-style-type: none"> Similar hazards have been recorded on a regular basis Considered that it is likely that the hazard could occur The incident has occurred more than once before and is liable to occur again
A moderate likelihood	<ul style="list-style-type: none"> Incidents or hazards have occurred infrequently in the past The incident has been recorded before and could happen again
A low likelihood	<ul style="list-style-type: none"> Very few known incidents of occurrence Has not occurred yet, but it could occur sometime Incident not previously recorded but is conceivable
A negligible likelihood	<ul style="list-style-type: none"> No known or recorded incidents of occurrence Remote chance, may only occur in exceptional circumstance

CONSEQUENCE DEFINITIONS	
Catastrophic	<ul style="list-style-type: none"> Multiple of single death Costs to Event of up to £10,000,000 International and National media outrage
Major	<ul style="list-style-type: none"> Serious health impacts on multiple or single persons or permanent disability. Costs to Event between £2-£5,000,000 National media outrage
Moderate	<ul style="list-style-type: none"> Accident resulting in an injury reportable under RIDDOR More than 10 days rehabilitation required for injured persons Costs to Event between £500,000-£2,000,000 Local media and community concern
Low	<ul style="list-style-type: none"> Accident resulting in minimal personal injury Injury to person resulting in lost time and claims Costs to Event between £500,000 - £1,000,000 Minor isolated concerns raised by stakeholders, customers
Negligible	<ul style="list-style-type: none"> Accident resulting in minimal personal injury Costs to Event up £500,000 Minimum impact to reputation

How to control hazards

By determining the consequences and likelihood of risks occurring, and to aim to eliminate, minimise and control the hazards.

Using the hierarchy of control systems to minimise or eliminate exposure to hazards. It is a widely accepted system promoted by the health and safety executive.

This hierarchy was used to decide the controls that need to be put in place to manage the hazards once the risk has been assessed.

HEIRACHY OF CONTROLS	
ELIMINATION Eliminate the hazard	Remove or stop the hazard if possible, remove the cause or source of the hazard, by eliminating the machine, task or work process. <i>If this is not practical, then substitute.</i>
SUBSTITUTION Substitute the process	Use a less hazardous process- use a less-noisy machine for the task, or introduce a less-noisy work process. <i>If this is not practical, then engineer.</i>
ENGINEERING Change the equipment	Introduce enclosures and barriers around or between the hazards. Improve maintenance procedures. <i>If this is not practical, then: isolate.</i>
ISOLATION	Separate or isolate the hazard or equipment from people by relocation or by changing the operation. <i>If this is not practical, then administer</i>
ADMINISTRATIVE	Design and communicate written or verbal procedures that prevent the hazard from occurring. <i>If this is not practical, then PPE</i>
PERSONAL PROTECTIVE EQUIPMENT (PPE)	Provide protective equipment appropriate to the risk. Provide training information and supervision to ensure that personal hearing protection is fitted, used and maintained appropriately. Equipment that protects the person exposed to the hazard.

Big Bang Education CIC – Visiting School Groups Risk Assessment: The Big Bang Fair 2020

<p>Visitor movement and crowd management, poor security and stewarding deployment:</p> <p><i>Members of the public, event staff and contractors</i></p> <p>Overcrowding can cause trauma and crush injuries</p>	<p>L 5 X C 4 = 20</p>	<p>The Big Bang Education CIC prior to the event has established the audience profile and expected behaviour of the public. In conjunction with this, there is a full crowd management plan that has been developed for this event under the guidance of NEC Security Team and other experts in this area.</p> <p>The Big Bang Education CIC will ensure that venue/room capacity has been identified and are not exceeded. Occupancy calculations have been carried out. The dynamic flow of the public has been assessed to enable a safe and free flow of the public around the whole exhibition.</p> <p>An assessment of the numbers of NEC Security and Stewarding personnel has been carried out. A full security deployment plan has been developed and will be in place at the exhibition to manage the public.</p> <p>Emergency evacuation routes have been identified and will be maintained at all times.</p> <p>If any stand or exhibit attracts overly large crowds of visitors then the stand/exhibit will be closed until such time as the crowd dissipates.</p> <p>Throughout the whole time the public is on site there will be constant monitoring of the crowds and people movement. The Event Safety Advisors, NEC Security and Event Control will log any issue, control and manage the situation until resolved and then assess the issue.</p>	<p>L 4 X C 2 = 8</p>	<p>Show access is staggered to reduce the number of people in any one part of the venue at any one time.</p> <p>NEC Stewarding staff to employ 'Clickers' and control the crowd at localised control points to manage density at all times.</p> <p>A specific crowd management plan will be created for stands of high interest, with the introduction of other control measures identified. This will be carried out in conjunction with the Big Bang Education CIC, the Event Team and NEC Security Safety Advisors.</p>

What is the hazard, who might be harmed and how	Initial Risk Rating	Control / Actions	Residual Risk Rating	Further Action /Controls																																															
<p>Lost Persons</p> <p><i>Members of the public, children and vulnerable adults, event staff</i></p> <p>Young person being separated from group or leaders, leaving the main space and going in hazardous areas, being approached by persons unknown to them.</p> <p>Distress, mental and physical vulnerability</p>	<p>L 5 X C 4 = 20</p>	<div style="text-align: center; border: 1px solid black; margin-bottom: 10px;"> <table border="1"> <thead> <tr> <th rowspan="2">LIKELIHOOD (L)</th> <th colspan="5">RISK RANKING MATRIX</th> </tr> <tr> <th>5</th> <th>10</th> <th>15</th> <th>20</th> <th>25</th> </tr> </thead> <tbody> <tr> <td>HIGH 5</td> <td>5</td> <td>10</td> <td>15</td> <td>20</td> <td>25</td> </tr> <tr> <td>SIGNIFICANT 4</td> <td>4</td> <td>8</td> <td>12</td> <td>16</td> <td>20</td> </tr> <tr> <td>MODERATE 3</td> <td>3</td> <td>6</td> <td>9</td> <td>12</td> <td>15</td> </tr> <tr> <td>LOW 2</td> <td>2</td> <td>4</td> <td>6</td> <td>8</td> <td>10</td> </tr> <tr> <td>NEGLECTIBLE 1</td> <td>1</td> <td>2</td> <td>3</td> <td>4</td> <td>5</td> </tr> <tr> <td>CONSEQUENCE (C)</td> <td>NEGLIGIBLE 1</td> <td>LOW 2</td> <td>MODERATE 3</td> <td>MAJOR 4</td> <td>CATASTROPHIC 5</td> </tr> </tbody> </table> </div> <p>There is a full event plan for dealing with lost children and vulnerable adults, all of the NEC security staff and all key Big Bang staff will know of this and how to implement it.</p> <p>If anyone is notified of a missing person directly by a member of the public or Guardians/Group Leaders, they must immediately notify Event Control. They will coordinate the whole process with the NEC security and the Event Team. The Big Bang management team will be informed of any missing persons. As soon as this is done the Lost person and Vulnerable adults procedure will come into full operation. Event Control will co-ordinate the operations until such time as repatriation of the missing person, all aspects of the situation will be logged and all responsible partners will be informed of the situation and as it unfolds and is resolved.</p> <p>There will be a record of the contact details of Guardians/Group Leaders attending the event that can be accessed should it be required</p> <p>At no times will lost children or vulnerable adults be left unaccompanied. They will always be accompanied by more than one member of the Event Team, with at least one being DBS Checked.</p> <p>The full Lost Person and Vulnerable Adults Management Plan is available to see on request</p>	LIKELIHOOD (L)	RISK RANKING MATRIX					5	10	15	20	25	HIGH 5	5	10	15	20	25	SIGNIFICANT 4	4	8	12	16	20	MODERATE 3	3	6	9	12	15	LOW 2	2	4	6	8	10	NEGLECTIBLE 1	1	2	3	4	5	CONSEQUENCE (C)	NEGLIGIBLE 1	LOW 2	MODERATE 3	MAJOR 4	CATASTROPHIC 5	<p>L2 X C 5 = 10</p>	<p>Event Control will deal with this situation professionally and involve all the required partners deemed necessary from the medical or security team or if any potential harm could arise, the Police will be involved to ensure the welfare of all staff and public.</p>

What is the hazard, who might be harmed and how	Initial Risk Rating	Control / Actions	Residual Risk Rating	Further Action /Controls
<p>Unruly Visitors: <i>Members of the public, event staff and contractors</i></p> <p>Visitors behaving in an anti-social manner that could impact on the safety of other visitors.</p> <p>Potential conflicts, overcrowding, crushing and possible hostile situations and fighting</p>	<p>L 5 X C 5 = 25</p>	<p>All incidents will be reported to Event Control and directions as to manage this will be given by them. Immediate engagement by NEC Security will take place and all actions will be recorded.</p> <p>It is imperative that Guardians/Group Leaders explain to the visitors in their care that they behave in a social and polite manner at all times, as they are not only representing themselves but the schools and organisations they are attending.</p> <p>Event staff observing unruly visitors will advise the Operations Team or Room Manager, who in turn will contact the Guardian/Team Leader and request that the visitor is reprimanded and brought under control.</p> <p>Such matters will not be treated lightly and it's the Events responsibility to maintain the safety for all those attending.</p> <p>In extreme cases of anti-social behaviour, visitors will be removed from the venue – under these circumstances there would be no re-admission. Visitors removed from the venue will be dealt with accordingly; the police will be informed and action will be taken based on this contact and if required prosecute any consequences of anti-social behaviour.</p> <p>The Event Team, Event Control, NEC Security and Event Safety Advisors to monitor.</p>	<p>L 2 X C 5 = 10</p>	<p>Any removal of person due to anti-social behaviour, will be carried out by SIA qualified staff, and in situations where a law has been broken the individual/s will be taken to a controlled area and the police will be informed and advise of the due process.</p> <p>Event Control will have access to all radio communications and will be directed to this point with key representatives from all the responsible partners involved in the event.</p>
<p>Exhibitors: <i>Members of the public, event staff and contractors</i></p> <p>Unsafe exhibits or demonstrations</p> <p>Slips trips and falls plus injuries caused by exhibition and stands</p>	<p>L 5 X C 4 = 20</p>	<p>All Exhibitors are required to submit detailed Risk Assessments, Method Statements, certification and public liability insurances to the Big Bang Education CIC.</p> <p>All of these documents are audited in advance of the event to ensure no unsafe exhibits or demonstrations are permitted in the event.</p> <p>During the pre-event phase and build phase all aspects of the exhibitor's installations are monitored and assessed along-side that of the activity taking place using the references mentioned earlier in this risk assessment.</p> <p>The Event Safety Advisor, prior to the event opening, visually inspects each and every aspect of all Exhibitors and their stand and demonstrations and only then will they be signed off enabling them to operate at the show.</p> <p>Throughout the whole time the public are on site there will be constant monitoring of the exhibitions and the Event Safety Advisors and Event Control will log any issue, control and manage the situation until resolved and then assess the issue.</p>	<p>L 2 X C 2 = 4</p>	<p>All Exhibitors are provided an Exhibitor Manual, which explains what activities, and substances are prohibited within the event.</p> <p>Each stand will have a stand check sheet that will be completed by the Event Safety Advisors prior to the public being on site and this database will be held in the event office.</p>
